# Atish Adhikari

Full-stack software engineer based in Canada

LinkedIn · GitHub

## EXPERIENCE

### MealSuite

Engineering Manager | September 2024 to May 2026

I led two engineering squads across frontend, backend, and QA. I worked with Product and Design to define features, plan releases, and work through technical decisions with the engineers building them. I continued contributing code while leading both teams.

Software Engineer | September 2023 to September 2024

I built features across the frontend, backend services, and data layer for healthcare software. My work included building React interfaces, implementing application logic, writing tests, and troubleshooting issues across the stack.

### Deerhold

Software Engineer | 2018 to 2023

I built web applications and APIs across client projects, including healthcare software, rules-based applications, and data visualization. I worked with React, Node.js, Python, and Django, and led development teams on several engagements.

### Deerwalk Training Center

Programming Instructor | 2018 to 2021

I taught Python, statistics, and introductory machine learning through hands-on exercises.

## EDUCATION

St. Clair College | Postgraduate diploma in Data Analytics for Business

NIT Rourkela | B.Tech in Computer Science and Engineering

## TECHNICAL EXPERIENCE

Frontend | React, JavaScript, SWR

Backend and APIs | Node.js, Express, Python, Django, Flask

Databases and caching | PostgreSQL, MongoDB, Redis

Messaging | RabbitMQ

Observability | Datadog, Sentry

Data processing and visualization | pandas, NumPy, Plotly
